BIOC 300
PARADIGMS IN BIOCHEMISTRY & CELL BIOLOGY

Explore paradigms in biochemistry and cell biology, with a specific focus on the “central dogma of molecular biology” using a flexible lecture schedule and live daily discussions! This online course utilizes online videos and associated questions to help understand the material along with daily scheduled online discussions of case studies and both historic and current research articles.

As this class is 100% online, make sure you can use a computer with the appropriate bandwidth to support required daily videoconferences.

WHY RICE ONLINE LEARNING?
- Advance in your degree program during the summer
- Easy to take classes while you’re engaged in a summer research project or internship
- Flexible lecture schedule and live daily discussions

Registration closes:
May 22 - Session II
